

In-Course Assessment Examination - 02
IT2143 (P) - Visual Programming (P)
Department of Physical Science, Faculty of Applied Science
University of Vavuniya

Time Allowed: **40 Minutes**

Date: 13/11/2024

1. You are tasked with developing a Windows Forms Application to register participants for a university event. The registration form should collect and store participant information in a SQL database.

- a. Create a database named **UniversityEventDB**. **(10 Marks)**
- b. Add a table with the following structure: **(10 Marks)**
 - i. Id (Primary Key, auto-increment)
 - ii. Name (varchar(50))
 - iii. RegNumber (varchar(20))
 - iv. DOB (date)
 - v. Gender (varchar(10))
 - vi. Faculty (varchar(50))

Use SQL queries to create the table.

Form Design: **(20 Marks)**

- c. Create a Windows Forms Application with the following controls:
 - i. **Labels:** For Name, RegNumber, DOB, Gender, Faculty.
 - ii. **TextBoxes:** For Name, RegNumber, and Faculty.
 - iii. **DateTimePicker:** For DOB.
 - iv. **ComboBox:** For Gender and Faculty.
 - v. **Button:** Submit to save the data.

Functionality:

- d. Write C# code to connect to the database. **(30 Marks)**
- e. Insert the entered participant information into the table when the "Submit" button is clicked. **(20 Marks)**
- f. Display a success message upon successful registration.
- g. If there is an error (e.g., connection failure or invalid data), display an error message. **(10 Marks)**
