

# In-Course Assessment Examination - III

Department of Physical Science

IT2143 – Visual Programming (Practical)

First Semester

**Time: 1 hour**

**June 2022**

Create a folder mentioning your registration number (e.g: 2018ICTXX) and save all your files inside that folder.

*Suppose you are a .NET developer and you have been requested to develop a “Pizza Ordering Application” for PizzaHut to allow customers to place a pizza order with options to customize pizza.*

*Use Visual Studio with C# and follow the given instructions below to create this Windows Forms Application with two forms. One form to allow a customer to customize a pizza order. Another form to display the order details.*

Use the controls/tools accordingly and design the windows forms as shown in the figures. You may use group boxes, labels, rich text boxes, list boxes, checkboxes, radio buttons, combo boxes, and buttons. Follow a proper naming convention for all controls.

## (Q1) ‘Pizza Order’ Form

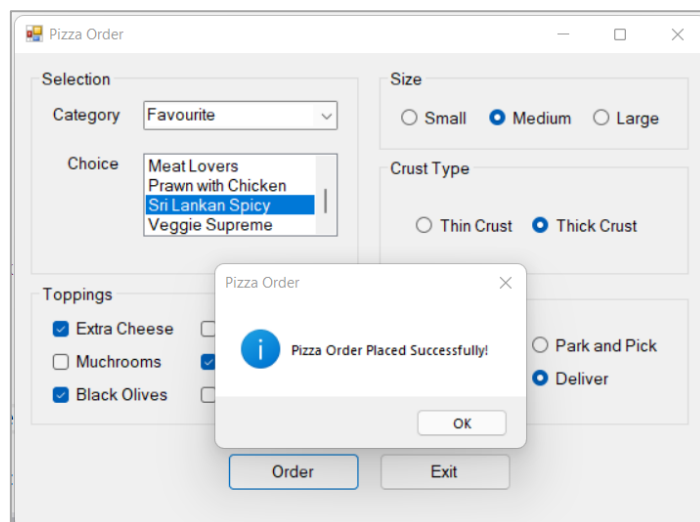

The screenshot shows a Windows Form titled "Pizza Order". It is divided into several sections:

- Selection:** Contains a "Category" dropdown menu with "Favourite" selected. Below it is a "Choice" list box with four items: "Meat Lovers", "Prawn with Chicken", "Sri Lankan Spicy" (which is highlighted in blue), and "Veggie Supreme".
- Size:** Contains three radio buttons: "Small", "Medium" (which is selected), and "Large".
- Crust Type:** Contains two radio buttons: "Thin Crust" and "Thick Crust" (which is selected).
- Toppings:** Contains six checkboxes: "Extra Cheese" (checked), "Onions", "Mushrooms", "Green Peppers" (checked), "Black Olives" (checked), and "Tomatoes".
- Where to Eat:** Contains four radio buttons: "Eat In", "Park and Pick", "Take Out", and "Deliver" (which is selected).
- Buttons:** At the bottom of the form are two buttons: "Order" and "Exit".

Firstly, the customer should select the ‘Category’ of the Pizza from categories ‘Classic’, ‘Signature’, ‘Favourite’, and ‘Supreme’. Then prices change according to the selected category, with different sets of ‘Choices’ to be displayed as follows,

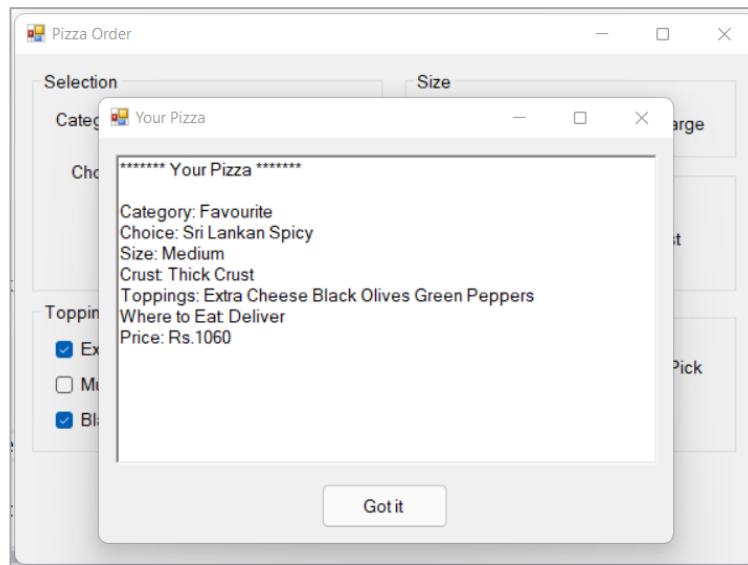

- Classic (Small size: Rs. 620)
  - Devilled Chicken
  - Cheese Lovers
  - Tandoori Chicken
  - Sausage Delight

- Signature (Small size: Rs. 680)
    - Spicy Veggie
    - Black Chicken
    - BBQ Chicken
    - Chicken Hawaiian
    - Chicken Masala
    - Cheese Fiesta
    - Spicy Chicken
  - Favourite (Small size: Rs. 750)
    - Sri Lankan Spicy
    - Butter Cuttlefish
    - Prawn with Chicken
    - Veggie Supreme
    - Beef Pepperoni
    - Meat Lovers
  - Supreme (Small size: Rs. 930)
    - Chicken Treat
    - Garlic Prawns
    - Spicy Seafood
- At a time only one *Choice* can be selected.
  - Then the customer can customize Pizza by adding toppings and selecting *Size* and *Crust Type*.
  - After that, he/she can choose where to eat.
  - For each *Topping*, additional Rs. 20 will be added.
  - The cost of *Medium* size is 20% and *Large* size is 40% more expensive than the *Small* size pizza.
  - If the customer has chosen *Park and Pick* option, additional Rs. 50 will be added.
  - If the customer has chosen *Deliver* option, additional Rs. 100 will be added.
  - Click *Exit* button to exit the application.
  - Click *Order* button to place the order.
  - A message box pops up to show the confirmation of order.

## (Q2) 'Your Pizza' Form

Order summary is displayed in *Your Pizza* form after *OK* button is clicked.

After clicking on *Got it* button *Your Pizza* form should be closed.
